SUMMARY

Full-Stack Developer and Data Analytics enthusiast pursuing M.Sc. in Information Technology specializing in Business Intelligence & Analytics. Skilled in building responsive web applications, database-driven systems, dashboards, and analytics solutions using Python, Flask, JavaScript, PHP, MySQL, MongoDB, Oracle, and Power BI. Passionate about developing scalable, user-focused software and data-driven solutions.

PROJECTS

- Academic 360 – Full-Stack Academic Management & Analytics System**
Python | Flask | MySQL | JavaScript | Chart.js | Jinja2
 - Developed a role-based academic management platform supporting Administrators, Teachers, Students, and Parents.
 - Implemented secure authentication, role verification, session handling, and password hashing.
 - Built dashboards for attendance, grades, student behaviour, and performance analytics with interactive visualizations.
 - Integrated analytical and AI-powered insights to support student progress monitoring and reporting.
- Shreeji HR Solutions Pvt. Ltd. – Business & HR Solutions Portal**
HTML5 | CSS3 | JavaScript | PHP | MySQL/XAMPP
 - Developed and deployed a responsive business website for an industrial manpower and recruitment company.
 - Built interactive service sections, inquiry workflows, responsive layouts, and dynamic user interactions.
 - Implemented a PHP-based contact system for processing inquiries and automated confirmation emails.
 - Optimized frontend assets and loading performance across desktop, tablet, and mobile devices.
- Parent-Teacher Interaction Platform – Hackathon Project**
HTML5 | CSS3 | JavaScript | REST APIs
 - Designed and developed a collaboration platform connecting parents, teachers, students, and administrators.
 - Implemented progress tracking, teacher feedback, announcements, real-time communication concepts, and meeting scheduling.
 - Focused on improving visibility into student progress and reducing communication gaps between stakeholders.

TECHNICAL SKILLS

- | | |
|------------------------------|--|
| Languages: | Python, Java, PHP, C, C++, JavaScript, SQL, PL/SQL |
| Web Technologies: | HTML5, CSS3, JavaScript, Flask, REST APIs, Responsive Design |
| Databases: | MySQL, MongoDB, Oracle Database, SQL, PL/SQL |
| Analytics & BI: | Power BI, Apache Hadoop, Apache Hive, Data Visualization, Data Cleaning |
| Tools & Concepts: | Git, GitHub, VS Code, XAMPP, Oracle SQL Developer, OOP, Data Structures & Algorithms, SDLC |
| AI & Others: | Generative AI, Prompt Engineering, AI Productivity Tools |

EDUCATION

- M.Sc. Information Technology Business Intelligence & Analytics**
JG University, Ahmedabad 2025 – 2027
Relevant Coursework:
Business Intelligence, Predictive Analytics, Data Warehousing, Distributed Data Systems, Enterprise Database Architecture, Advanced PL/SQL
- Bachelor of Computer Applications**
GLS University, Ahmedabad 2023 – 2025
Relevant Coursework:
Software Development, Object-Oriented Programming, Database Systems, Data Structures & Algorithms, Full-Stack Architecture

ACHIEVEMENTS & INTERESTS

- | | |
|----------------------|---|
| Achievements: | <ul style="list-style-type: none">Built and deployed multiple full-stack projects with real-world use cases.Actively participated in hackathons and coding challenges. |
| Interests: | Data Analytics, Web Development, Problem Solving, AI Tools, Open Source Contributions. |

CAREER OBJECTIVE

To leverage my skills in full-stack development and data analytics to build scalable solutions and contribute to innovative projects while continuously learning and growing in a challenging environment.
